### **REASONS FOR ALLOWANCE**

1. Claims 1-8 are allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: the prior art made of record does not teach or fairly suggest in combination a system and method for generating required telephony voltages directly on station cards, rather than on the basis of a large, central ringing or other power supply that supply such telephony voltages to each of the station cards. In accordance with the present invention, a plurality of station cards is provided in the telephony or communication system. One or more DC power supplies provide a source of DC voltage, such as 12 volts, to each of the station cards. The station cards are coupled to a processor of the system. The station cards support a plurality of analog and/or digital telephony devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(US 4,535,448) Baxter et al discloses a dual bus communication system provided close coupling between the data and voice services of the CS300 communication system. One of these busses is a time division multiplex bus arranged for communication between port access circuits and the other bus is a packet-switched
